## **CLARO PRECISION ENGINEERING STAFF RUN FOR CHARITY**

Three members of staff from North Yorkshire engineering firm Claro Precision Engineering, have completed this year's Great North Run to raise thousands of pounds for two national charities.

Company director, Mike Lewis ran the race for the second time in support of the British Heart Foundation, in memory of a friend who died aged 41. Factory quality and training manager Mark White, participating for the fourth time, also ran in support of the British Heart Foundation.

Running the race for the first time was milling team leader, Rob Tunnicliffe. Rob who suffers from impaired hearing, raised funds for Hearing Dogs for the Deaf.

All three participants were fully supported by fellow Claro employees, customers, suppliers and friends who made substantial financial contributions prior to the event.

Commenting, director Mike Lewis said: "The support from fellow colleagues, friends and business associates has been fantastic. We are all delighted to have successfully completed the run, and the money raised will go help the work of two very worthwhile charities."

## **Background Information**

Claro Precision Engineering was established in 1978 and operates from purpose built premises in Knaresborough, North Yorkshire.

The business employs 47 people and produces a wide range of precision items, kits and assemblies. These include medical implants and tools, aerospace components, laser parts and assemblies as well as components for the defence, security, fire protection, sub sea and microwave communications and other industries.

Using a wide range of CNC machining centres including Bridgeport, Hitachi Seiki and five Matsuura high-speed CNC machining centres backed up with conventional machining, fitting and assembly, Claro Precision offers one of the most comprehensive subcontract services available for concept to component manufacture. ISO 9001 approved, the company prides itself on the quality of its service and has won the national World Class Engineering competition for precision machining for three consecutive years. The level of professionalism offered has enabled Claro Precision Engineering to win and retain contracts with a number of household names.
